

Electric boatbuilder Silent Yachts is opening a luxury resort in Fiji powered entirely by solar energy

Scooter Doll | Jun 12 2023 - 8:16 am PT | 4 Comments

Silent Resorts – the exclusive partner of solar electric boatbuilder [Silent Yachts](#), is building off the early success of its first fully-sustainable residences and intends to bring a new solar-powered resort to the island nation of Fiji. These exclusive residences are being erected to promote sustainability and exploration while offering some income opportunities for the exclusive members who buy in.

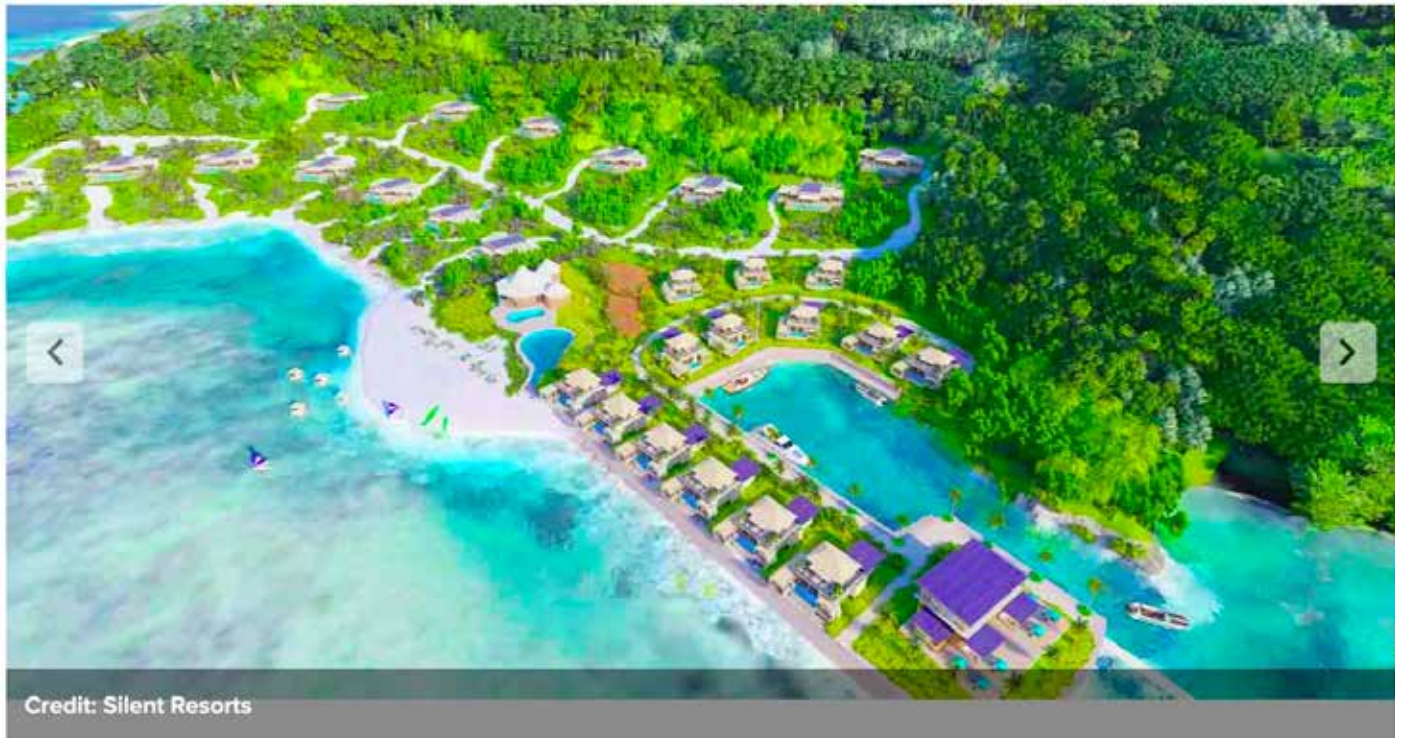

Silent Resorts is a relatively new entity spun out of a sustainable boatbuilding company that remains relatively nascent in its own right. Silent Yachts is the result of nearly two decades worth of research and development from its cofounders who, combined, have sailed over 75,000 nautical miles around the world.

We've followed the Austrian boatbuilder as its solar electric-catamarans got bigger and have gone further at sea. We've also seen newer products that have gotten smaller recently, like Silent Yachts' [all-electric tender](#).

Our coverage of the company led us down to Fort Lauderdale, where we got to climb aboard the SILENT-60 and [take a solar electric voyage](#) for ourselves. About a month

prior to that, the boatbuilding branch announced Silent Resorts had [joined the Silent Group](#) with plans for a solar-powered paradise in the Bahamas.

The initial resort features 16 solar powered, four-bedroom residences and [8 Silent yachts](#) that not only help power the resort, but also offer a place for residents to stay off-shore. While construction is underway in the Bahamas, Silent Resorts is already working to open a second tropical solar haven in Fiji. Check out these hyper-realistic renderings.
