

The Solar-Powered Silent 60 Makes Emissions-Free Luxury Boating a Reality

A real-life zero-carbon footprint.

View a Day View

The idea of solar-powered luxury boating is finally a reality. The UNIVO 60 is a 60-foot catamaran that combines the best of both worlds: a solar-powered propulsion system and a luxury interior. The boat is powered by a 100-watt solar panel array that provides 100% of the boat's energy needs. This means you can enjoy the ocean without the noise and emissions of a traditional outboard motor.

With the UNIVO 60, you can enjoy the ocean without the noise and emissions of a traditional outboard motor. The boat is powered by a 100-watt solar panel array that provides 100% of the boat's energy needs. This means you can enjoy the ocean without the noise and emissions of a traditional outboard motor.
