

New Silent Yachts 62 3-Deck Open In Depth Video: She Runs on Sunshine

THE MAGIC OF SOLAR CELLS can power the 62 Silent Yacht all day on a single battery charge. As the electric motor (lower right) draws power from the batteries (upper left) to propel the boat, the solar panels replenish the energy supply. See our in-depth video on how it all works -- with complete test data.

Silent Yachts is the pioneer in sustainable cruising yacht propulsion, and just in case you want to cruise at night, the special 143 kW generator (upper right) will quickly fill up the batteries. Learn about this yacht that is leading a new Industry.
